

httplib::Request::get
_header_value_count

```
graph LR; A["httplib::Request::get_header_value_count"] --> B["nvinfer1::r"]
```

A diagram showing a call from a function in the httplib namespace to a variable in the nvinfer1 namespace. The function is httplib::Request::get_header_value_count, and the variable is nvinfer1::r. A blue arrow points from the function to the variable.

nvinfer1::r
