

```
process_attribute<  
  arg >::init
```

```
graph LR; A["process_attribute<  
  arg >::init"] --> B["nvinfer1::r"]
```

A diagram showing a flow from a process attribute to a register. On the left, a gray rectangular box with a black border contains the text `process_attribute<` on the first line and `arg >::init` on the second line. A dark blue arrow points from the right side of this box to the left side of a white rectangular box with a black border on the right. This second box contains the text `nvinfer1::r`.

```
nvinfer1::r
```
